Summary

Project Status Summary
The project is moving along as planned. Some things took longer than anticipated while others took less time. All in all, signs look clear for a successful finish for March 31st 2019. Major things left to accomplish include data access, UI changes and full project deployment.

Accomplishments As Planned	Planned but not Accomplished
Back-end (Connecting Database to frontend, setting the routes, adding CRUD operations for customer and employee)	
Create back-end of already completed login page and create permissions for admin, employee and customer.	
Data Accessing, processing and submission. (Legal scrapping of data, data transformation and submission to the database).

Managing Issues and Risk

Issues/Problems	Resolution Strategy	Due Date
No issues or problems related to development or our team.		

Upcoming Risks	Risk Ranking (Hi, Med, Low)	Risk Impact (Hi, Med, Low)	Mitigation Strategy
Getting card api to work might be tricky, we want to make card search dynamic by filtering all cards but, number of cards is large and it might take a long time for the webpage to load.	Low	Hi	Assign another team member to this task or implement none dynamic card search which can be done by simply asking API to return card that matches name entered
Getting components to connect to each other and allowing a button to enable/disable a certain functions throughout the whole application/	Med	Hi	If the need for more focus arises, another teammate will be asked to help work on the issue

NOTE: Attach additional sheets if insufficient space available
